How Lumana AI works

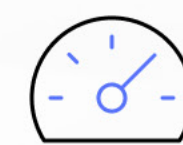

Self-learning AI

Leverage faster and more accurate AI that optimizes based on your environment.

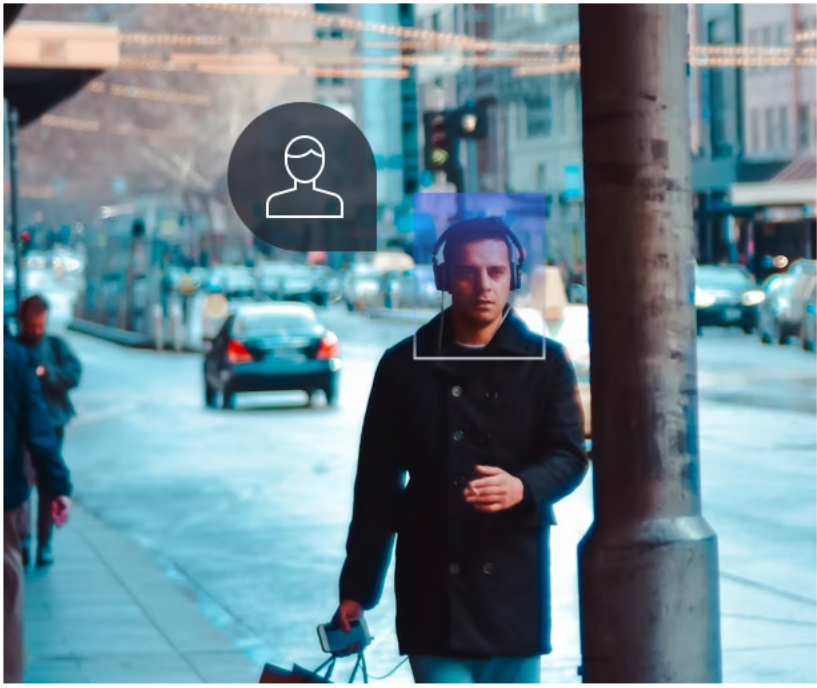

Human-like perception

Eliminate manual monitoring with real-time AI that monitors your environment at scale.

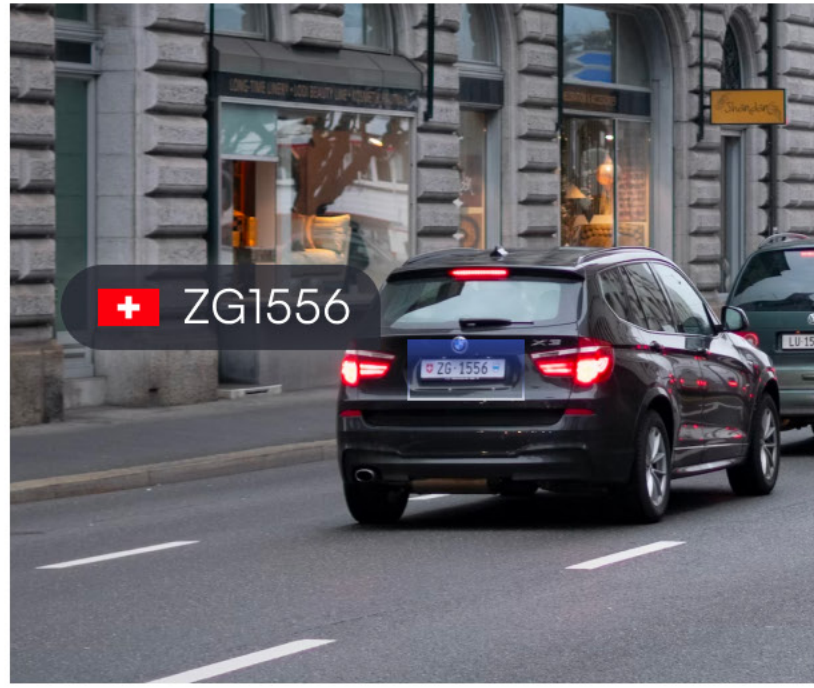

Immediate response

Resolve incidents as they unfold with instant notifications for detected threats or anomalies.

Facial recognition

Protect your space from unknown individuals with real-time alerts and investigations based on faces.

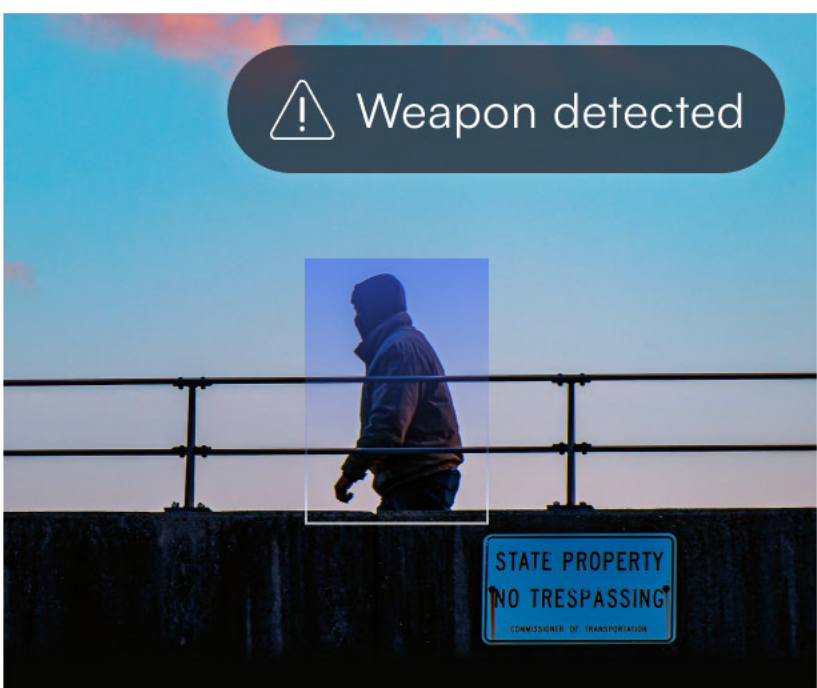

License plate recognition

Capture vehicle insights and receive notification when a license plate match is detected.

PPE detection

Safeguard your employees with automatic monitoring and alerts for missing protective equipment.

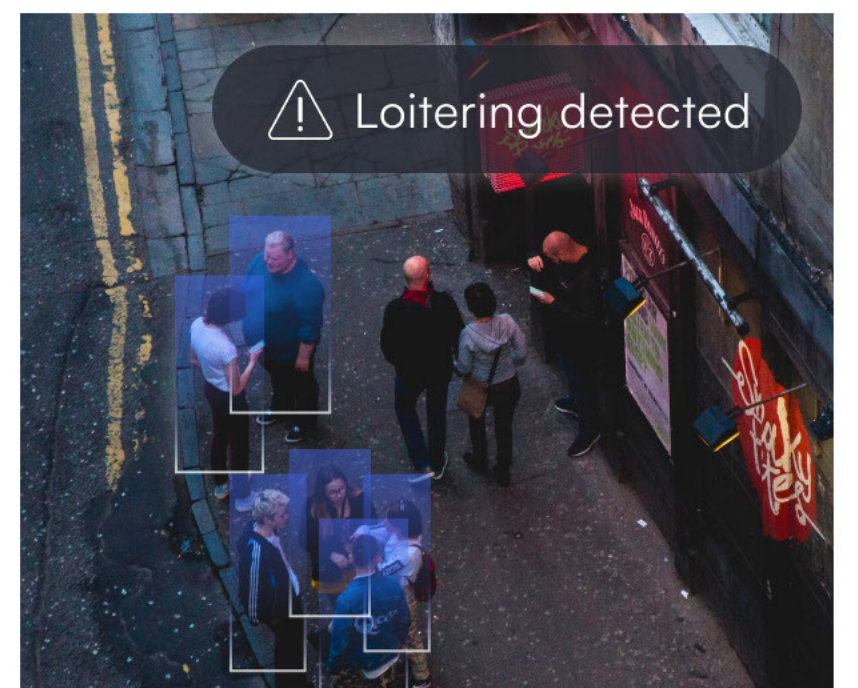

Threat detection

Receive notifications for detected threats and easily share video footage with first responders.

People counting

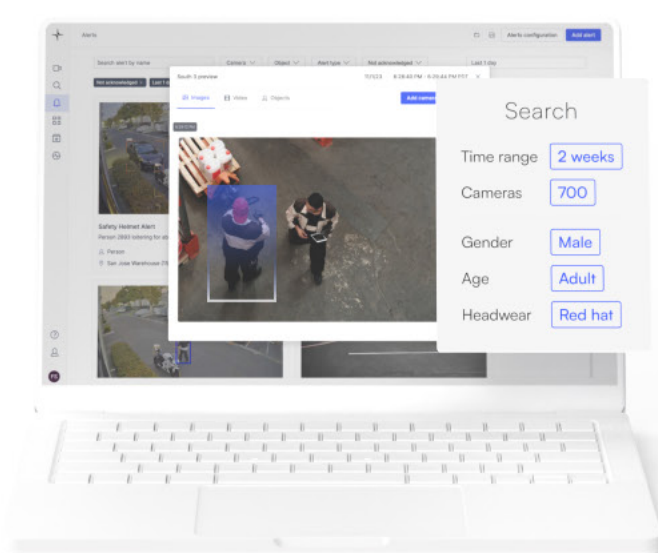

Capture live data from video and measure foot traffic, occupancy, and space usage.

Perimeter protection

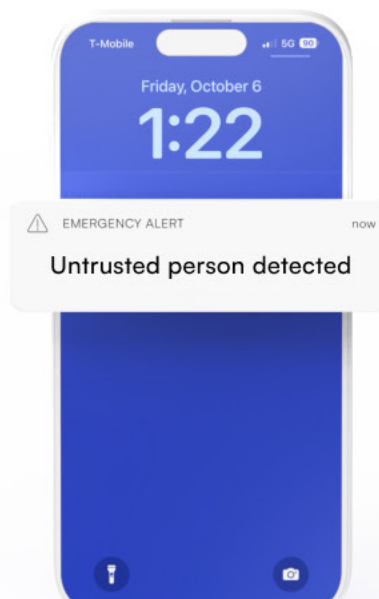

Protect your people and property with real-time alerts for loitering, tampering, and abnormal behavior.

Discover all of Lumana's AI solutions at www.lumana.ai

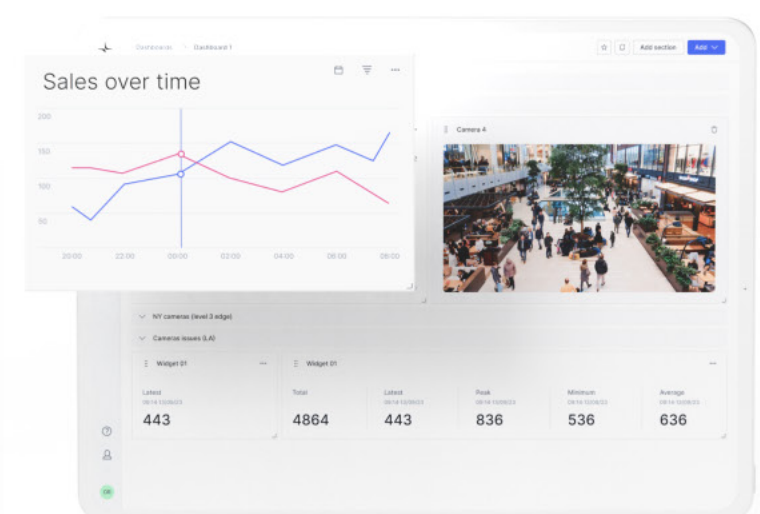

Investigations

Easily search millions of hours of video in seconds with AI-powered search tools.

Real-time alerts

Resolve incidents as they unfold with proactive alerts sent via SMS, email, or mobile app.

Dashboards

Automatically capture live data from video to unlock new insights to drive smarter decisions.
