

# Modern AI-powered video security

Lumana is a complete video security system powered by cutting-edge AI to improve safety, operations, and incident response. Built with simplicity in mind, Lumana offers powerful security cameras, intuitive video management software, and integrated AI to provide unmatched visibility and situational awareness at scale.

## Unlock the power of visual intelligence

Set up alerts with natural language, receive notifications for anomalies, and find footage in seconds with Lumana's patented visual AI.

### Smart search

Find footage with highly specific person, vehicle, and object parameters.

### Real-time alerts

Receive real-time alerts and monitor thousands of cameras with unparalleled efficiency.

### AI dashboards

Capture data and obtain new operational insights from video to drive better business decisions.

## Core

Self-learning AI engine that provides unprecedented AI performance and modern video security management.

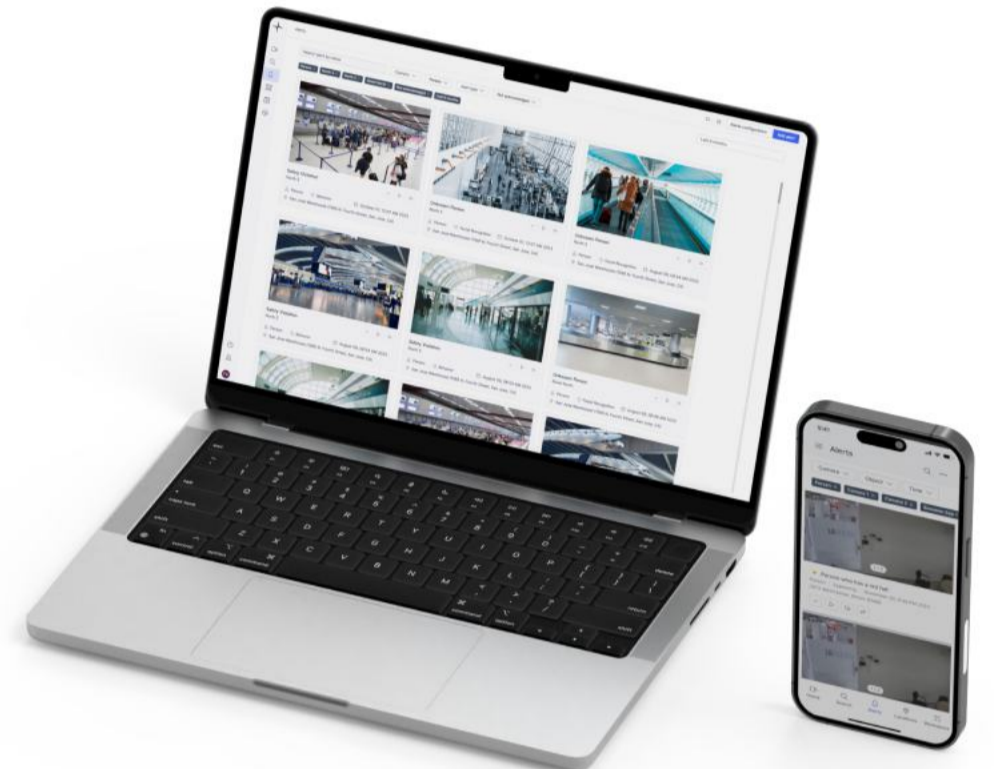

- Compatible with Lumana cameras or transforms existing security cameras into AI-powered devices.
- Built-in AI and real-time video processing enable blazingly fast object detection and instant alerting capability.
- Securely store video locally for up to 90 days via industrial-grade SSD or up to 365 days in the cloud.

## VMS+

Modern video security management with integrated AI designed to improve security, safety, and operational efficiency.

- Centrally manage unlimited cameras and users from a single platform — anywhere, anytime, from any device.
- Obtain enhanced situational awareness and accelerate incident response with real-time alerts and automated workflows.
- Search millions of hours of video in seconds and find specific objects, people, and vehicles.

## Cameras

Enterprise-grade IP cameras engineered to deliver sharp video resolution, reliable performance, and easy deployment flexibility.

- NDAA-compliant cameras with enterprise-grade encryption and automatic firmware updates.
- Plug-and-play installation with indoor/outdoor flexibility for uncompromising visibility in any environment.
- Obtain complete peace of mind with Lumana's lifetime warranty on all hardware and software.

## Simply smarter video security

### Search and resolve in seconds

Find targeted footage with Smart Search and easily share video in just a few clicks.

### Unified physical security

Streamline system management with a centralized, cloud-based platform.

### From reactive to proactive

Accelerate incident response and awareness with real-time AI alerts.

### Eliminate inefficiencies

Reduce complexity and gain real-time visibility without the monitoring fatigue.
